T distribution of the difference of means 627
Table A 335-340, 738
Table C 374, 375, 377, 378, 742
Table B 362, 366, 740
Table F 660, 747
Table E 634,745
Table D 712
Table D 621, 622
Testing Hypothesis between rows and between columns 654
Testing for goodness of fit 671
Testing Hypothesis on means 645
Testing Hypothesis on Means using the F Distribution 645
The linear correlation coefficient 702
Total variation 640 - 643, 645, 650 - 654, 659,703
Transitive Law 118, 135
Two-factor classification 640, 649
Two independent events 195
Type I error, definition 480
Type II error definition 502

Uniform distribution 254
Union of sets 84
Uniqueness of the complement 118, 135
Universal set, definition 57 - 59

Variance

 Binomial Distribution 328, 329
 Binomial distribution 328
 Chi-Square Distribution 665-669, 690
 Correlation and Regression Analysis I 702, 707
 Correlation and Regression Analysis II 710
 Definition 276
 F Distribution 634-638
 Measuring Variation 35-42
 Non parametric Statistics 720, 726, 728
 Normal Distribution 374
 Variance of a random variable 271
Variation between treatments 640, 642, 645, 659
Variation within treatments 640, 642, 645, 659
Venn Diagrams 77, 88
Z distribution (see Standard normal distribution)
